# High Q Capacitors, High Temperature - H range

The Ultra-low ESR "H" range offers a very stable, X8G High Q material system that provides excellent low loss performance. Optimised for lowest possible ESR, the electrode system provides low metal losses resulting in flatter performance curves and reduced losses at higher frequencies.

An extended operating temperature range of -55°C to +150°C accommodates modern high density micro electronics requirements.

This range of high frequency capacitors is suitable for many applications where economical, high performance is required.
